Brief Overview of Nominated Project

Project Description

This project includes the cleaning and painting of all metal surfaces on two bridges on US101 @ M.P. 194.3 and 212.5. These are overhead steel truss bridges that were in need of repainting. The project also included new paved panel joints and new expansion joints on the driving surface of the bridges.

Customer-Focused Administration

During the course of the project, it was evident that Southern Road and Bridge wished to perform the highest quality work within the least amount of time. They also partnered with WSDOT on more than one occasion to mitigate the impacts to the traveling public by opening up both lanes when construction activities were not ongoing. This was greatly appreciated by the surrounding community during a weekend festival in Forks, WA. Southern Road and Bridge was receptive and very quick to respond to any requests by WSDOT.

Innovative Problem Solving

Southern Road and Bridge proposed a cost reduction to the project to utilize recyclable abrasive blast media to remove the existing paint, rust, and other foreign material on the steel bridges. By utilizing recyclable abrasive blast media they were able to complete the blasting with significantly less abrasive material and generated significantly less hazardous waste. The storage and disposal of hazardous waste is a force account item paid by WSDOT, and this innovative solution greatly reduced this cost to the taxpayers. Southern Road and Bridge brought up very specialized equipment to recapture, separate, and reuse the steel grit during the blasting process. It was very evident that Southern Road and Bridge was a highly experienced company whose mission was to perform very high quality work with as little impact to the environment as possible.

Overcoming Extraordinary Challenge

There were several challenges that were overcome on this project:

1. Class 1 containment was required. This is the highest level of containment and Southern Road and Bridge was able to meet the specifications with no major releases.
2. Short project duration with limited working hours. This project was to be complete in 90 working days with only Sundays not being counted. Due to nesting birds in the area, the Contractor was only allowed to work between 2 hours after sunrise to 2 hours prior to sunset. To meet this aggressive schedule, Southern Road and Bridge worked numerous Sunday shifts and in the end worked

**Washington State
Department of Transportation**

on both bridges simultaneously to complete the project within the allowable working days.

3. First WSDOT contract by an out of state company. This was Southern Road and Bridge's first WSDOT contract and they worked diligently to learn our submittal and materials acceptance processes. To add to this challenge, WSDOT bridge and structure reviews were hired out to a consultant. This meant that the lines of communication went through 1 extra channel and this added time and confusion to the process of approving submittals. Southern Road and Bridge worked diligently to return corrections asap and was able to get all submittals approved without significant delays to the project. Even during the most frustrating times, the project team from Southern Road and Bridge kept a positive attitude, responded quickly, and remained professional.
4. Weight/ Loading restrictions on the bridges. Due to weight/load restrictions, the bridges had to be painted in stages. First, the underdeck steel was painted with the requirement that only 1 lane of traffic could be allowed and had to be in the center of the bridge. Then once the underdeck platform and containment was removed, then the traffic could be swapped to one side or another to perform all the overhead work. This restriction made the task of completing the project in a short duration that much more difficult.

Effective Contract Administration

Southern Road and Bridge did a fantastic job of learning a new process and submitting all documentation prior to beginning work. The project teams communicated very well and kept a very professional attitude. Submittals and materials documentation was submitted in a timely manner and all requests from WSDOT were answered quickly. Southern Road and Bridge was also very helpful and took the time to explain any items of confusion to the WSDOT team.

Timely Completion of Project

Southern Road and Bridge worked very efficiently and was able to complete both bridges within the allowable time. They worked numerous Sundays to make this happen and they were determined to get the work done in time.

Safety

Southern Road and Bridge is a safe working company and there were no accidents on this project. They were also very helpful with ensuring that our project inspector had appropriate equipment and stayed safe at all times. They went above and beyond what was required to drive our inspector from the project site back to the shower facility each day during the blasting and painting work. In addition, when our inspector was ill, the project foreman volunteered to driver her to the local hospital. This was appreciated greatly and showed that Southern Road and Bridge cared about all members of the project team.

Mehta Reference Letter

Dear Mr. Pappas,

This reference letter is to acknowledge our appreciation with Southern Road and Bridge's excellent work in completing the subject coatings renewal project on time and under budget. This project was challenging as the cleaning and coating work was going on concurrent with other Central Florida Expressway Authority (CFX) work within the project limits of the coating project. Southern Road and Bridge was very cooperative working with our Mehta CEI team and the other active concurrent project teams and with coordination of vegetation removal with the owner CFX maintenance division.

The tell tail sign of an excellent quality project is when we get to the semi-final inspection and all work is found to be acceptable, by all, with no deficiency list items and the semi-final inspection becomes the final inspection and the project is ready to be recommended for final acceptance to the owner, which was the case with this project. Great Job!

We look forward to working with Southern Road and Bridge on similar future CFX projects.

To Whom it may concern:

Please find this letter of recommendation for Southern Roads and Bridge an A+ for upcoming projects that they propose an interest in. Their quality of work was top of the line and as well as the important documents sent in from the main office (correct and on time). This is the second project that I have had with Southern Roads and Bridge and both has turned out excellent.

- 1.) The painting of West Bay Bridge over the Intercoastal waterway (Bay County, FL.).
- 2.) Dupont Bridge abutment repair after Hurricane Michael (Bay County, FL.)

I would highly recommend Southern Roads and Bridge for any future projects.
